SELECT – #2 – *sometimes* PECKY

GREEN – KILN DRIED

FULL RGH – S4S – S1S2E – PATTERNS – RESAWING

Custom Lumber Manufacturing (CLM) has been in business for over 25 years, specializing in a full array of Cypress products, including Fencing, Boards, Patterns, Lumber, and Timber. CLM focuses on producing VOLUME CYPRESS for the WHOLESALE DISTRIBUTION CHANNEL, and CLM's product and service portfolio includes saw-milling, air drying, kiln drying, surfacing, patterns, resawing and sizing. CLM continually has well over One Million Board Feet on the ground and turning through, with this footage in varying stages of Log Form, Sawing, Air-Drying, Kiln Drying, Production, and Finished Goods. CLM's plant assets include Sawmill, Fence Line, 4 Dry Kilns, Wind Tunnel, 5 Weinig molders, 5 smaller molders, 2 resaws, a gang rip, a cut-up line, and warehouse storage. As a participating member of the Southern Cypress Manufacturers Association (SCMA), CLM is dedicated to the continuance of the Cypress resource.

Cypress is considered a "betweenner" regarding softwood or hardwood. Cypress trees are softwood conifers, yet shed foliage in the fall like hardwoods. Cypress Design Values are sponsored by the Southern Pine Inspection Bureau (SPIB), yet Appearance Grades are published by the National Hardwood Lumber Association (NHLA). Cypress is usually the most affordable of three North American naturally oiled softwoods, the other two being Cedar and Redwood, making Cypress a good choice for wood that's exposed to moisture conditions that cause decay, and in exterior coated applications such as siding, fascia, soffits, trim, decking, fencing, posts and timbers. Because Cypress also machines well, resists warping and splitting, and glues, sands and finishes well, it is suited for interior uses such as paneling, moulding, millwork, cabinetry and flooring. Cypress "*THE WOOD ETERNAL*", having been used for thousands of years, continues to provide value for today's lumber industry:
